AGA GI LEARN Procedure Log

The AGA's easy-to-use, web-based procedure log is the system of choice for more and more training programs. Procedures stored in one central location allowing easy assessment of procedural skills learned during training.

The AGA's procedure log helps:

Trainees

- ▶ Enter all procedures on a regular basis at your convenience.
- ▶ Develop a comprehensive understanding on the indications, pathology and complications of diagnostic and therapeutic procedures.
- ▶ Meet documentation and verification of procedure requirements for the ABIM certification exam.
- ▶ Report key procedure data for credentialing purposes.

Training Directors

- ▶ Evaluate and report on your trainees' procedural competence throughout the academic year.
- ▶ Comply with accreditation policies and reduce administrative burdens.
- ▶ Increase productive interaction and feedback between you and your trainees.
- ▶ Use this beneficial tool for recommending new hires and verifying credentials.

"The AGA's procedure log is comprehensive, easy-to-use, and an invaluable tool for program directors to track the progress of their fellows."

— Deborah D. Proctor, MD, AGAF,
Medical Director,
Yale University School of Medicine
