Learning Objectives:

Upon completion of this workshop, successful learners will be able to:

1. Define three key competencies for developing a competency-based curriculum for GI training – Clinical/Cognitive, Procedural and Scholarly competencies.
2. Develop techniques for teaching and evaluating Clinical/Cognitive, Procedural and Scholarly competencies in GI training.
3. Determine what tools are available in terms of competency-based training.
4. Review current issues pertaining to GI training programs as addressed by the Program Directors’ Caucus.
5. Describe the role of the program director in further fellowship training (4th year training).
6. Demonstrate how to successfully prepare for an ACGME site visit.
7. Develop practical skills for becoming an effective program coordinator or administrator in your training program.

Sunday, February 27, 2011

6:30 – 7:45 AM
Breakfast
