

# Breaking the Stigma of Hepatitis C

**74%**  
of hepatitis C sufferers  
believe the public thinks they  
are mostly drug addicts and  
lead unhealthy lifestyles...

...when in fact, only  
**30%**  
of the general public feel they  
are mostly drug addicts and  
lead unhealthy lifestyles.

Hepatitis C is a very democratic disease that affects people from all walks of life. In fact, 70% of those with the disease don't even know it.
