

ENSURING A  
HIGH-QUALITY  
COLONOSCOPY:

# QUESTIONS TO ASK

How often your GI reaches the start  
of the **large intestine**?

The most skilled doctors reach it

**MORE THAN**

**95** %  
OF THE  
TIME.

How often your GI finds polyps during  
routine screenings?

It's common to find them in

**ABOUT 25** %

**OF ROUTINE  
SCREENINGS.**

Colorectal cancer  
screenings begin at age 50.  
AGA wants you to know  
what makes a high-quality  
colonoscopy.

BROUGHT TO YOU BY THE AGA INSTITUTE

How often patients'  
**poor bowel prep** leads  
to incomplete exams?

Hopefully, it is

**LESS THAN**

**15** %  
OF THE  
TIME.

When you should return  
for a **follow-up exam**?

Most patients don't  
need another exam for

**10** YEARS.
