

Preserve his access to specialty care.

Vote “NO” to Medicare Cuts – and “YES” to a real solution.

When it comes to an increasingly flawed Medicare physician payment system, falling back on the usual “quick fix” every January — temporarily staunching payment cuts — is like treating a patient’s life-or-death hemorrhage with a tiny bandage. A real solution to his condition becomes more elusive — and more expensive — in the long run.

This year, you can stop the costly cycle of quick fixes to a damaged Medicare payment system:

STOP THE BLEEDING

End the 10% Medicare payment cuts scheduled for January 2008.

STABILIZE THE PATIENT

Pass a two-year, fully funded payment increase.

FIND THE RIGHT TREATMENT

Use the two years to correct a flawed Medicare payment formula.
